

Pascal 程序模版

```
program program_name; {程序名称}
begin
    assign(input, 'program_name.in');    {打开输入文件program_name.in}
    assign(output, 'program_name.out'); {打开输出文件program_name.out}
    reset(input);
    rewrite(output);

    {解题代码写在这里}

    close(input);      {关闭输入文件}
    close(output);     {关闭输出文件}
end.
```

Hello, World!

```
program helloworld;
begin
    assign(input, 'helloworld.in');
    assign(output, 'helloworld.out');
    reset(input);
    rewrite(output);

    writeln('Hello, World!'); {输出 Hello, World!并换行}

    close(input);
    close(output);
end.
```
